

School Counseling

We design and deliver developmentally appropriate activities and services to students in the areas of:

- social/emotional development
- academic skills
- early career awareness

We accomplish this through:

Instruction

We teach classroom lessons on topics such as listening, following directions, friendship, growth mindset, careers, and self-advocacy to name a few.

Advisement

We work with students to help them make well informed decisions about their future beyond our school.

Meeting with Individuals & Small Groups

We offer check-ins for students regarding situations impeding school success. We are not therapists, however, but can connect families to resources.

Collaboration

We consult and collaborate with families, teachers, coaches, and other school stakeholders, providing referrals for community resources as needed.
